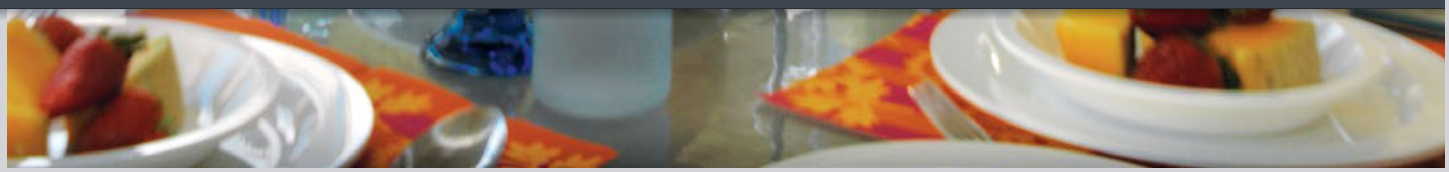
Stratco Sanctuary®

Verandahs | Patios | Carports



Stratco Sanctuary®

The strong and attractive Stratco Sanctuary® Verandah, Patio or Carport provides an ideal refuge from life's challenges and a comfortable place to re-energise.

Transform your outdoor space effortlessly with the affordable Stratco Sanctuary range. Crafted for simplicity, durability, and ease of installation, our Verandahs, Patios, and Carports are designed to enrich your home and lifestyle. With a range of colours to harmonise with any setting, the Flat Roof Sanctuary spans up to 7.3 metres and is available attached to the home or as a freestanding unit.

Featuring robust Prodek® roofing, the system uses strong and attractive beams and rafters with a sleek glossy finish. Powdercoated tubular posts and back channels ensure a cohesive aesthetic. External beam brackets and resilient Prodek roof sheeting, renowned for its trapezoidal ribs and water-carrying capacity, guarantee both style and durability.

Invest in a durable Stratco Sanctuary system – a testament to quality with high tensile steel components, galvanised fixings, and easy installation. Fully engineered and tested to comply with all relevant Australian Standards, it's a lasting enhancement for your outdoor living space.

How To.

STRATCO™

MAINTENANCE Regular maintenance is essential to maintain the good looks of all Stratco steel products and to ensure you receive the maximum life-span possible in your area. Washing with clean water must be frequent enough to prevent the accumulation of dust, salts, and pollutants or any other material that will reduce the life of the product. Stratco steel products that are regularly washed by rain require no additional maintenance. No Stratco steel structure or materials are recommended for use over, or in close proximity, to swimming pools or spas. No material that retains water (such as dirt or paving sand) should be placed against the columns. Care must be taken when determining the location of Stratco steel products so that they are not placed in close contact with sources of pollution or environmental factors that could affect the life of the steel. Refer to the 'Selection, Use and Maintenance' brochure for more information.
