

Squash Top Security Fence

Strength | Style | Security

Stratco Squash Top Fencing Adds Strength, Style and Security to Your Premises

Drilled Through Design

The design of Stratco Squash Top Fencing utilises the strength of galvanised steel and incorporates 25/25 squash top pickets which are inserted through the 40/40 cross rail adding a smoother flowing look. The pickets are inserted through laser cut holes in the rail and welded for added strength and security.

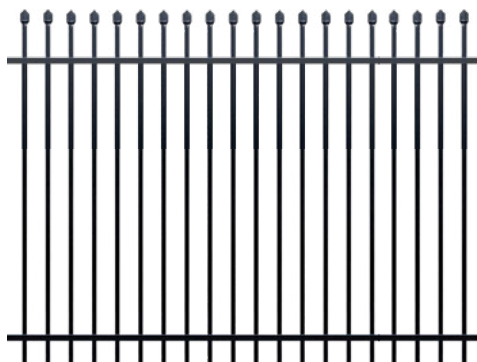

All styles are manufactured from galvanised steel, silicone bronze welded and powder coated Satin Black for longevity.

Single and double gates available in-stock.

Sliding gates available to order.

Gates and Accessories

The range includes single, double or sliding driveway gates. Sliding driveway gates can be ordered with an optional motorised remote gate opener for easy entry and exit. Sliding driveway gates are only available to order, please check with your local Stratco team for availability.
